

# Tantin Group

# PROJECT PROPOSAL

Boundless Endeavors, Tantin is Everywhere

Tantin as a Metaphor • Connecting and Coexisting

# I.Tantin Goals Five Major Goals for 2025-2035

Tantin Group is rooted in the global Web3 and AI industries, focusing on the next 10 years. With forward-looking strategic planning and innovation-driven initiatives, we have established five grand goals:

# 1. Tantin Coin (CTC): The native token of Tantin Chain

Tantin Chain is a high-performance, highly scalable blockchain protocol developed by the industry's top team. Its goal is to become the world's largest public chain within 3 years, leading the innovation and adoption of blockchain technology.

- CTC, as the native token of Tantin Chain, is its core asset.
- CTC Positioning: The #1 global investment asset!
- Total supply is fixed at 2 billion CTC tokens with no future minting.

# Tantin Public Chain: To become the world's largest public chain by 2028.

The Tantin Public Chain is a high-performance, highly scalable blockchain protocol independently developed by Tantin Group, designed for the global Web3 and AI ecosystems. It aims to become the core infrastructure of the digital economy era.

Through technological innovation and architectural optimization, the Tantin Public Chain effectively addresses the performance bottlenecks, high costs, and ecosystem fragmentation of traditional blockchains. It provides secure, efficient, and scalable underlying support for decentralized applications (DAPPs), digital assets, cross-chain collaboration, and AI-driven smart contracts.

The plan is to develop into the world's largest public chain within three years, leading the innovation and popularization of blockchain technology.

## 2.TT Exchange (TT)

# TT Exchange is a financial operating system that can support billions of users worldwide.

- Trading Engine: Makes the financial system extremely fast.
- Security System: More reliable than bank insurance.
- Global Architecture: A financial brain that never crashes.
- Intelligent Evolution: The exchange will "learn." We are equipping the platform with an "AI brain."
- Ecosystem Empowerment: Developers and users build cars together. TT is not just building cars, but also creating an "automobile factory + gas station + repair shop" ecosystem.

### 3.Breakthrough 10 Million+ Token Holders

Leveraging global node campaigns, innovative incentive mechanisms, and a top-tier technological ecosystem, Tantin Group is confident in surpassing 10 million+ token holders.

Leveraging global node elections, innovative incentive mechanisms, and top-tier technical ecosystem strength, Tantin Group is confident in achieving this milestone. Supported by the high-performance Tantin Public Chain and diverse application scenarios, precise marketing and global partner support will ensure broad coverage of target markets.

Combining the explosive growth of Web3 and AI with the deflationary appreciation potential of Tantin Coin, Tantin will lead the industry in achieving a historic breakthrough in user scale, becoming the digital asset of choice for global users.

**First Month** 

\$100 million

**Second Month** 

\$200 million

**Third Month** 

\$300 million

**Tantin Group Profit Sources:** 

**Contract-based revenue: 40%** 

**GAS fees: 25%** 

Other sources: 35%

First-Year Profit: \$3 billion USD

→ 80% of Group profits will be used to buy and

destroy CTC.

#### **CTC Price Forecast (Three Phases)**

- Phase 1: Surge 200x on the listing day.
- Phase 2: Gradual correction.
- Phase 3: Continuous growth for 10 years.

# 4. Massive Web2 and Web3 User-Built Tantin Digital Currency Exchange

Leading in user experience, security, trading depth, and diversified high-quality services, while ensuring compliance with local regulatory requirements.

Goal:To become the preferred exchange for global users, surpassing Binance in liquidity, user scale, and asset reserves.

## 5. Creating 10 Million+ Millionaires and 100,000 Billionaires

Through the appreciation of Tantin Coin, profit-sharing from the exchange, and ecosystem incentive programs, Tantin Group aims to become the world's largest company by market capitalization within 10 years, helping 10million+ users become millionaires and 100,000 users become billionaires.

Tantin Group, with technological innovation and ecosystem empowerment at its core, will inspire global users' wealth growth and influence explosion. Over the next decade, it will lead the digital economy wave and reshape the global value landscape!

# **II. Core Ecosystem**

#### **Core Ecosystem**

#### **1.Tantin Chain**

#### **Technical Features:**

- High throughput:Supports massive transaction processing.
- Smart contracts: Convenient development components adaptable to multiple industry scenarios.
- Cross-chain interoperability: Enables seamless connections between different blockchain ecosystems.
- Openness:Provides developers with rich tools and resources to promote ecosystem prosperity.

#### 2. Tantin Coin (CTC)

- Functional Positioning: As the core token of the ecosystem, it is used for paying transaction fees, participating in platform governance, and ecosystem incentives.
- Issuance Mechanism: Adopts a transparent distribution mechanism, reserving a portion of tokens for ecosystem development, developer support, and community incentives.

#### **Core Ecosystem**

#### 3.TT Exchange (TT)

- Core Functions: Supports spot trading, leveraged trading, contract trading, staking mining, lending, AI coin selection, and AI strategy education.
- Innovative Highlights: AI-driven risk control system for real-time monitoring and responseto potential risks; userfriendly interface design to enhance trading efficiency and experience.

#### 4. Tantin Web3 Wallet

- Core Functions: Multi-chain asset management, DApp interaction, NFT storage, cross-chain trading, and Web3 and AI service integration.
- User Experience: Employs the highest level of security protocols while providing a simple and intuitive user interface.

#### **Core Ecosystem**

#### **5.Tantin Laboratory**

- Research Directions:Blockchain privacy protection,DeFi innovation mechanisms,NFT standard optimization, Web3 and AI technology integration, and new application development.
- Support Mechanisms: Establishes developer reward programs to drive technological innovation and application implementation.

# III.Two Major Revenue Sources of Tantin Group

#### **Two Major Revenue Sources**

# 1.Public Chain Revenue: GAS fees, cross-chain bridges, and DEX's multiple profit engines

**GAS Fees:** Each transaction on the Tantin Public Chain requires a GAS fee to support the chain's operation and security.

**Cross-Chain Bridge Revenue:** The Tantin Public Chain features an efficient cross-chain bridging protocol, supporting asset interoperability with mainstream blockchains like Ethereum, Bitcoin, and Solana. Each cross-chain transfer charges a certain fee.

**Decentralized Exchange (DEX) Revenue:** The DEX deployed on the Tantin Public Chain generates income through transaction fees, liquidity mining incentives, and listing fees.

#### **Two Major Revenue Sources**

### **2.Exchange Transaction Fee Revenue**

The Tantin Exchange will charge fees for spot trading, derivatives trading, and lending services, continuously optimizing services to attract more users and form a stable revenue source.

# IV. Profit Distribution Mechanism Tantin Coin to Rise Continuously for 10 Years, with a 100,000-Fold Increase

### Five Burn Mechanisms Fueling a Decade-Long Surge

- 80% of all platform transaction fees are used to buy and burn CTC; 20% allocated to operational costs.
- 80% of contract-based profits are used to buy and burn CTC; 20% allocated to company operations.
- 80% of GAS fees are used to buy and burn CTC; 20% allocated to company operations.

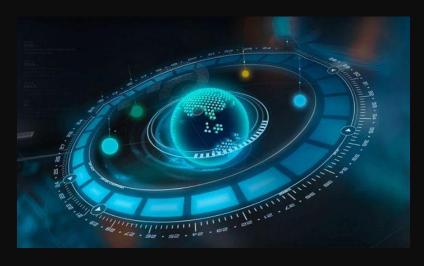

4 Listing fees: 80% used to buy and burn CTC; 20% allocated to company operations.

CTC transfer fees: 80% of CTC obtained from transaction fees is burned; 20% allocated to company operations.

## The world's first economic incentive model

#### Multiple ecological binding

By leveraging two core revenue streams—exchange transaction fees and public chain transfer fees— Tantin Coin (CTC) is fully integrated with ecosystem application scenarios.

#### **Circular Economy Model**

The income will be used for destruction, continuously optimizing the supply and demand relationship and driving up the value of Tantin Coin.

#### **User win-win mechanism**

The core of the economic model is to motivate ecological participants. Every transaction and participation of users can boost the growth of the market value of Celestial Coin and achieve common prosperity of the ecology.

#### Market value management advantages

# Strong deflationary properties

Through large-scale destruction, continuous supply reduction is achieved, enhancing the value of tokens.

#### **Market confidence increases**

A stable and transparent income distribution mechanism sends a signal of long-term development to the market, enhancing user trust and willingness to hold.

# Steady development of ecology

Through stable operations and market incentive funds, we support the ecosystem's technological innovation and user growth to ensure long-term competitiveness.

# Tantin Group relies on its unique revenue source and the world's first economic incentive model to achieve a virtuous cycle between Tantin coin market value management and ecological development.

With its unique revenue source and the world's first economic incentive model, Tantin Group achieves a virtuous cycle between Tantin coin market value management and ecological development. Through a multi-dimensional revenue model and a transparent and efficient fund allocation strategy, Tantin Group will not only push Tantin coin market value to exceed the expected target, but also build a sustainable Web3 and AI digital economic system to help global users and partners achieve win-win results.

## Phase 1:

Initial Preparation and Brand Establishment(1 Year)

#### Team building and compliance work:

- Complete the construction of the core team and confirm various senior positions (such as Asia Pacific Operations Director, CTO, CFO, etc.).
- Register a compliant company, apply for necessary qualifications and licenses, and ensure compliance with legal and regulatory requirements around the world.
- Teacher Yu will give a lecture the first ten consensus conferences to expand brand influence and promote recognition from global users and partners.
- 20 global campaigns global nodes
- Complete the design and testing of Celestial Coin to ensure technical feasibility.

# Platform construction and first phase of ecological implementation:

- Release the first version of the Tantin digital currency trading platform, providing basic spot trading, leveraged trading and staking mining functions.
- Release the basic version of the Tantin Web3 wallet, supporting multi-chain asset management and simple DApp interaction.
- Start the research and development of the Tantin public chain and improve the technical architecture.

## Phase 2:

**Product Expansion and User Growth(2-3 Years)** 

#### Tantin public chain test network:

- Launch the Tantin public chain test network to attract developers to participate and promote the development of decentralized applications.
- Optimize the performance of the Tantin public chain and add more smart contract functions and cross-chain interoperability.

#### Trading platform and wallet expansion:

- Improve the Tantin trading platform and launch more new features such as trading pairs, leveraged trading, and derivatives trading.
- Enhance the functions of the Tantin Web3 wallet, add NFT storage, cross-chain transactions, and more DApp access.
- Introduce AI coin selection and strategy education functions to attract more users to use the trading platform.

#### **Marketing and ecological incentives:**

- Launch global marketing to attract more users to join the celestial ecology, and strive to launch an additional 10 million+ coin holders.
- Introduce an ecological incentive plan to promote the participation and contribution of developers and community members.

## Phase 3:

Global Expansion and Deep Collaboration(4-6 Years)

#### **Tantin Coin Market Value Breakthrough:**

- Achieve a market value breakthrough of 200 trillion US dollars for Tantin Coin, becoming an important component of the global Web3 and AI ecosystem.
- Promote Tantin Coin to become the mainstream in the field of digital assets, develop global ecological applications, and promote the continuous growth of market value.

# Build the world's largest digital currency trading platform:

- Tantin Trading Platform has become the preferred exchange for global users, supporting transactions of multiple fiat currencies and digital currencies.
- Strengthen platform security and user experience, and launch more innovative trading products.
- Introduce more global partners to expand the exchange's global market share.

## Phase 4:

**Technological Innovation and Global Governance(7-9 Years)** 

### Tantin public chain becomes the core infrastructure:

- Realize the global application of Tantin public chain, become the digital economic infrastructure, support largescale commercial applications and developer ecology.
- Provide more decentralized finance (DeFi) functions and conduct cross-chain interoperability with more blockchain ecosystems around the world.

# Combining technological innovation with AI:

- The Astronomical Laboratory will continue to promote research and innovation in the fields of blockchain privacy protection, DeFi innovation mechanisms, and AI technology integration.
- Deeply integrate AI technology with Web3 applications, launch AI-based digital asset management, investment decision-making and other tools, and enhance user experience.

#### **Global governance and decentralization:**

- Complete the construction of a global decentralized governance framework, and the community and developers will jointly participate in the decision-making and management of the celestial ecology.
- Promote the legalization of celestial currency on a global scale, obtain the recognition of local regulators, and establish a more complete compliance mechanism.

## Phase 5:

**Global Influence and Future Prospects(10 Years)** 

# Tantin becomes the world's leading Web3 and AI platform:

- Tantin Group has gained extensive influence around the world and has become a leader in the digital economy.
- Create 100,000 global billionaires through Web3 and AI-driven wealth redistribution.

# Market value management and ecological stability:

- Through destruction and market incentive mechanisms, continue to promote the growth of the market value of Tantin Coin and ensure the scarcity and value of tokens.
- Provide a strong user win-win mechanism to ensure the healthy development of the Tantin ecology and promote the sharing of global wealth.

#### **Future expansion of Tantin:**

 Achieve unlimited expansion in technology, ecology and market, promote more innovative business models and application scenarios, and continue to lead the future development of Web3 and AI.

"Tantin", as the core value philosophy, endows the project with profound philosophical significance and strategic direction for future development. Through the breadth and depth of the cosmos, using Tantin as a metaphor, it reveals the essence of Web3 and AI technologies and conveys the vision of breaking boundaries, connecting and coexisting, and infinite innovation.

#### **Definition and Symbolism of Tantin**

#### 1.Definition and Symbolism of Tantin

- Harmony between the whole and the individual: The universe is a whole composed of countless celestial bodies, and each celestial body is an indispensable individual. The Celestial Group is committed to building a decentralized ecosystem, connecting all nodes closely, and forming an indivisible Web3 world.
- Ecological interconnection: This combination embodies the core spirit of blockchain "decentralization". All individuals collaborate in equality to form a powerful ecological force and promote the development and evolution of the whole.

#### 3. Unlimited business

- Crossing traditional boundaries: Celestial bodies imply breaking through the limitations of traditional industries, regions and technologies, and creating a new era of Web3 that integrates technology, economy and culture.
- Infinite extension pattern: Just as the universe continues to expand, Celestial bodies' business is boundless, committed to achieving global development, and becoming the core promoter of the Web3 world.

#### 2. Powerful energy

- Unlimited potential: Just as the universe contains infinite energy, celestial bodies represent the potential and vitality in the digital economy.
- Multi-dimensional empowerment: This energy is reflected in four dimensions:
- Technological innovation: Based on the celestial public chain, it continuously promotes performance, compatibility and security.
- 2. Funding support: Through diversified income models, it injects strong momentum into the sustainable development of the ecosystem.
- 3. User consensus: Through strong community collaboration and consensus, a stable and strong user base is formed.
- 4. Global influence: With cutting-edge concepts and technological advantages, it radiates the world and promotes the widespread implementation of the ecosystem.

#### **Tantin's Core Values**

#### 1. Connection and symbiosis

- Synergistic ecology: Tantin emphasizes the synergy between individuals and the whole, relying on technology and economic models to seamlessly connect users, developers and investors to jointly build a prosperous WEB3 ecosystem.
- Value sharing: Through Web3 and AI technology and economic incentive models, promote fair distribution of value and achieve win-win results for ecological participants.

#### 2. Infinite possibilities

- Endless innovation: Tantin's boundlessness symbolizes the eternal pursuit of innovation and exploration. Through modules such as public chains and trading platforms, new business models and application scenarios are constantly generated.
- Future potential: Tantin ecology is the starting point of countless possibilities. Every innovation has a profound impact on users and the global economy.

#### 3. Inclusiveness and win-win

- Global wealth sharing: Tantin uses economic incentive mechanisms to enable ordinary people to achieve wealth growth and economic freedom, and promote the universalization of wealth distribution.
- Consensus-driven prosperity: With "consensus" as the core concept, Tantin encourages global users to participate through fair and transparent ecological rules to jointly promote ecological prosperity and sustainable growth.

#### **Extension of Tantin Spirit**

# 1. Technical level: Stability and unlimited expansion

- Stability & Innovation in Balance: Tantin's technical architecture is as stable as the universe, while offering galaxy-like functional scalability, ensuring the ecosystem's long-term development.
- Infinite Scalability: Through the high-performance Tantin Public Chain and cross-chain interoperability, it provides a solid foundation for decentralized applications, smart contracts, and global services.

# 3. Cultural level: breadth of thought and global influence

- Cognitive Elevation: Through community education, technical outreach, and consensus-building, Tantin advocates deep intellectual exploration and cognitive leaps, fostering comprehensive user understanding of blockchain and digital economies.
- Global Resource Attraction: Like a gravitational field, the project attracts global users, developers, and partners through its strong vision, technical prowess, and business model, collectively advancing the Tantin ecosystem.

#### 2. Economic level: Strong engine and global layout

- Diverse Revenue Model: Tantin leverages two major income streams exchange transaction fees and GAS fees—to form a robust selfsustaining economic cycle.
- Global Economic Strategy: By integrating regional resource advantages, it builds a worldwide blockchain ecosystem for global deployment and growth.

### Tantin 's unique philosophical implication

# 1. Taking "sky" as the vision, expanding the vision of globalization

- Tantin takes the universe as a reference, reflecting the global pattern that transcends regional and industry boundaries.
- Through the multi-dimensional combination of technology, economy and culture, Tantin has created boundless future possibilities for users and partners.

# 2. Taking "body" as the core, aggregate individual value

- Tantin regards every user as an important part of the ecosystem.
- Through collaboration and consensus, every individual can realize their own value in the ecosystem and become an important force to promote overall development.

# 3. Guided by "philosophy", promote technological and economic innovation

- The philosophy of Tantin stems from a deep insight into the universe, Web3 blockchain and AI, focusing on both the stability of technology and the sustainable development of the ecosystem.
- Guided by this philosophy, Tantin is not only a technological innovator, but also a thought leader in the digital economy era.

# 7 Tantin

# Boundless Endeavors, Tantin is Everywhere

"Tantin"is not just the name of a project but a philosophical expression of the future Web3 and Al world.

Taking "all universe individual combinations" as the starting point, Tantin not only focuses on the innovation of technology and business models, but also strives to promote the globalization, inclusiveness and sustainable development of the digital economy. Tantin, with its strong vision, unlimited potential and continuous innovation, will break through traditional boundaries, create a truly boundless career blueprint, and lead the brilliant future of Web3 and AI era!

——Yu Lingxiong
Chairman of Tantin Group

Tantin as a Metaphor • Connecting and Coexisting
